### The milky way in Dongsha

Due to the tourist ban, few people are staying on the island, which makes it a tranquil and unpolluted place. Luckily, under this condition, we are able to see this magnificent sky.

### Dongsha

## 02 Introduction

Due to its invaluable coral reef ecosystem and relevant biologies, Taiwan government decided to add another duty from military used to Dongsha island, which is a national park.

Terms of Use Report a map error

Dongsha National Park locates in the northern part of South China, 450 kilometers from Kaohsiung, Taiwan. It is contained in the Dongsha atoll, which makes it look like being embedded in the circle of the atoll. Those circles actually are the shape of the atoll, form by coral polyps for millions of years.

Except the incredible biologies and over 250 species of corals, such as the blue fire coral and octopus, the historical remains passed through centuries are doubtlessly valuable. Dongsha, this name was firstly

## ABOUT

LANDSCAPES

The following pictures are all taken in Dongsha Atoll National Park, shot by Alice and Isabel. Please don't make it for other use without permission.

Along by the beach  
 Can't you imagine how chill it is to walk along by this wonderful beach in the afternoon? The wind blew through your hair. It was a little bit itchy, but you could not deny how comfortable it was.
