

YANGTZE FINLESS PORPOISES ^{3D}card

cephalopod diy pop-up card

Pop-up book of the Cetaceans

Steps:

1. Cut the components following the cutting line.
2. Fold according to the marks. (Use a stylus or a used ballpoint pen to draw the folding lines before folding.)
3. Paste the points with the same alphabets together (e.g., A to A, B to B).

Mark descriptions:

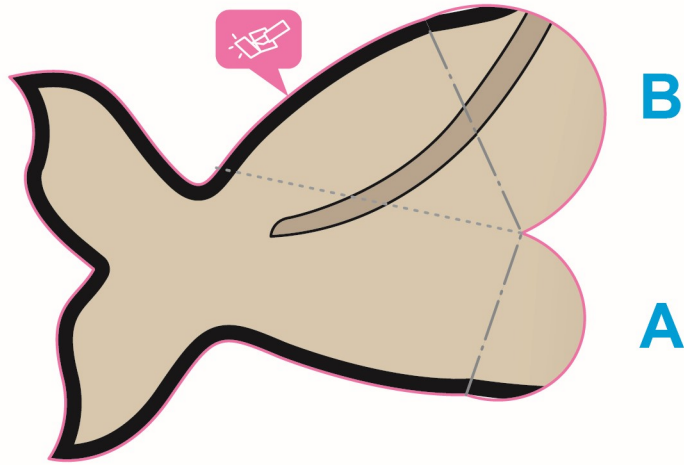

Cutting line

Mountain fold

Valley fold

Yangtze finless porpoises

Yangtze finless porpoises are mammals and classified as toothed whales, with a body length of about 1.6-1.9 meters and a blowhole. They have no dorsal fin but only a narrow, raised ridge. We can see them in shallow waters in eastern Asia and they are easily affected by human activities.
